Overview

【Japan】
 In April, Same Store Sales became 95.6% and All Store Sales became 93.5%.
 April saw many days with temperatures higher than average nationwide, and sales of spring items from our main brands performed well, resulting in increased number of customers and significantly higher sales at Same Stores. On the other hand, a decline in the number of customers at core SC brands affected overall sales at Same Stores, which fell below the previous year's figures.
 EC sales were 96.3% year-on-year.

【Japan】
 Notes Same Store : Stores and online stores operated fully through the previous year, excluding stores which closed more than 3 days in a month due to the renovation and other reasons.
 All stores : Stores and online stores
 EC: Online stores operated by our company and third parties.
 * Normally, when calculating Same stores, stores that are closed for 3 days or more during the month are excluded, but as an exception, the same month of the previous year is not excluded.

These are the preliminary result we usually announce on every 2nd business day* of the succeeding month.
 In case of discrepancy between the preliminary result and the official result, we announce the revised figure together with the preliminary result of the next month.
