Overview

【Japan】
 In May, Same Store Sales became 100.5% and All Store Sales became 98.3%.
 May saw many days with temperatures like early summer across the country, resulting in strong sales of summer items for many major brands. Although there was a decrease in customer numbers at a major SC brand with large sales volumes, strong performance from other brands compensated for this, and overall Same Store Sales exceeded those of the previous year.
 EC sales were 94.7% year-on-year.

【Japan】
 Notes Same Store : Stores and online stores operated fully through the previous year, excluding stores which closed more than 3 days in a month due to the renovation and other reasons.
 All stores : Stores and online stores
 EC: Online stores operated by our company and third parties.
 * Normally, when calculating Same stores, stores that are closed for 3 days or more during the month are excluded, but as an exception, the same month of the previous year is not excluded.

These are the preliminary result we usually announce on every 2nd business day* of the succeeding month.
 In case of discrepancy between the preliminary result and the official result, we announce the revised figure together with the preliminary result of the next month.
